

Untitled version 1.0

Typography titles pack

Before opening the project I recommend install following fonts:

[Roboto](#)

[Montserrat](#)

[Codec](#)

[Neue Montreal](#)

[Integral CF](#)

[Gill Sans](#)

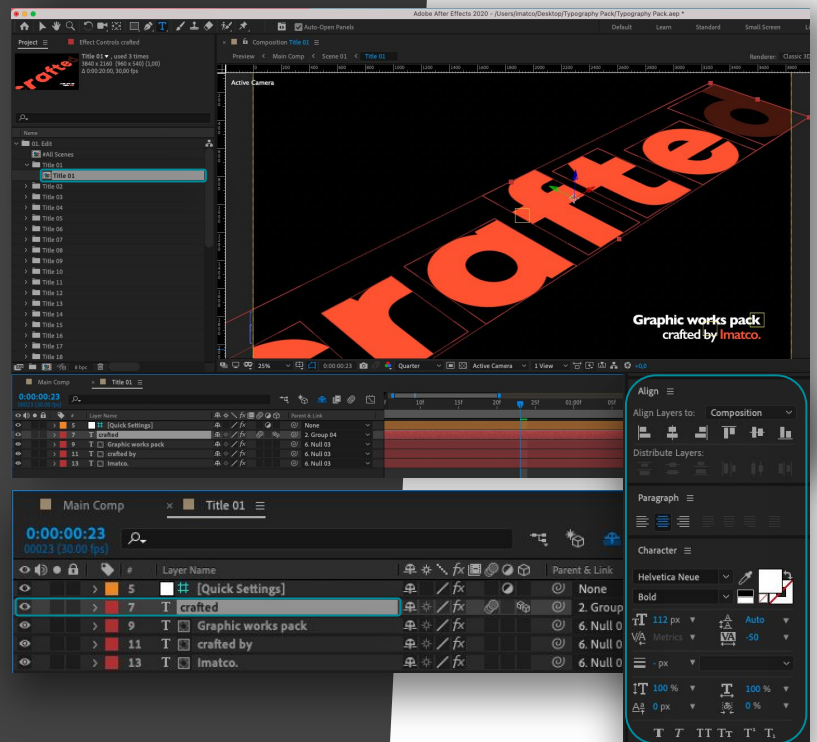

[Bebas Neue Pro](#)

[Joongnajoche](#)

Edit Titles

1. In project window, open the folder **01-Edit** > **01 - Title 01** and edit composition **Title 01**.
2. Double-click on **Text layer** to replace text.
3. Change text size and align if needed by using the **“Align and Character tabs”**.
4. Change text size using the **Character tabs”**.

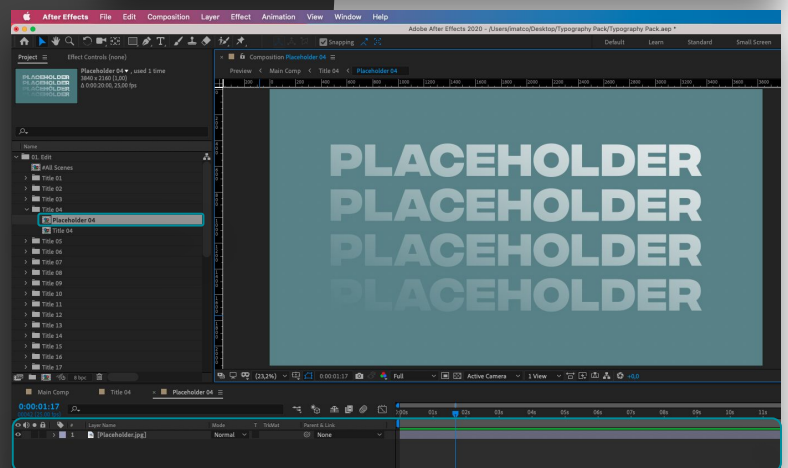

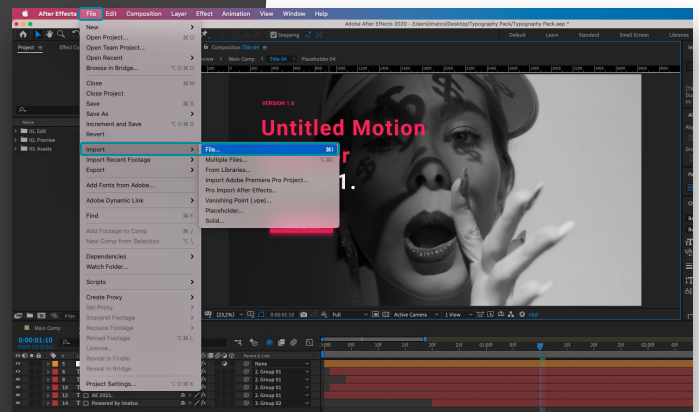

Repeat the same action for all titles.

Add Footage

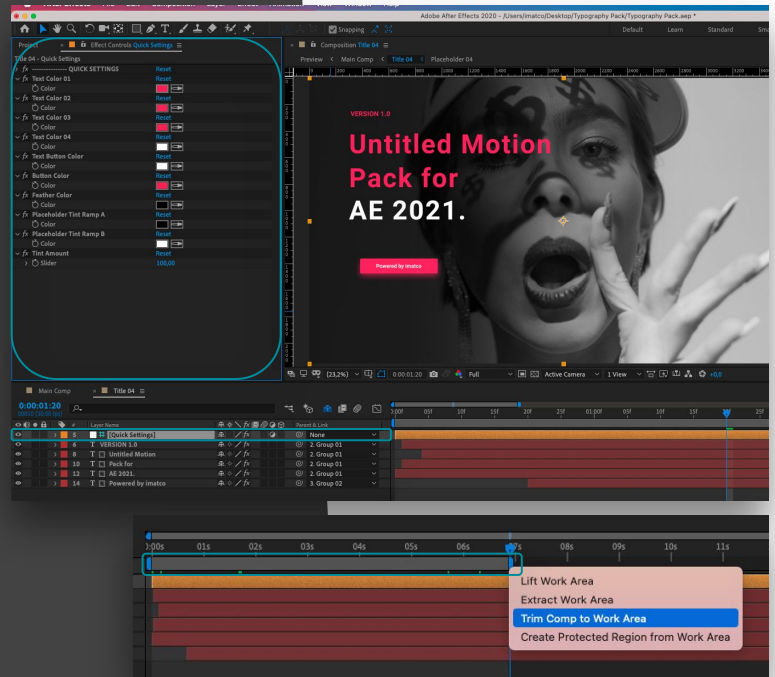

1. **Import** footage into After effects.
File > Import > File...
2. In project window, open the folder **01-Edit** > **Title 04 > Placeholder** drag and drop footage to the composition.

Repeat the same action for all Placeholders.

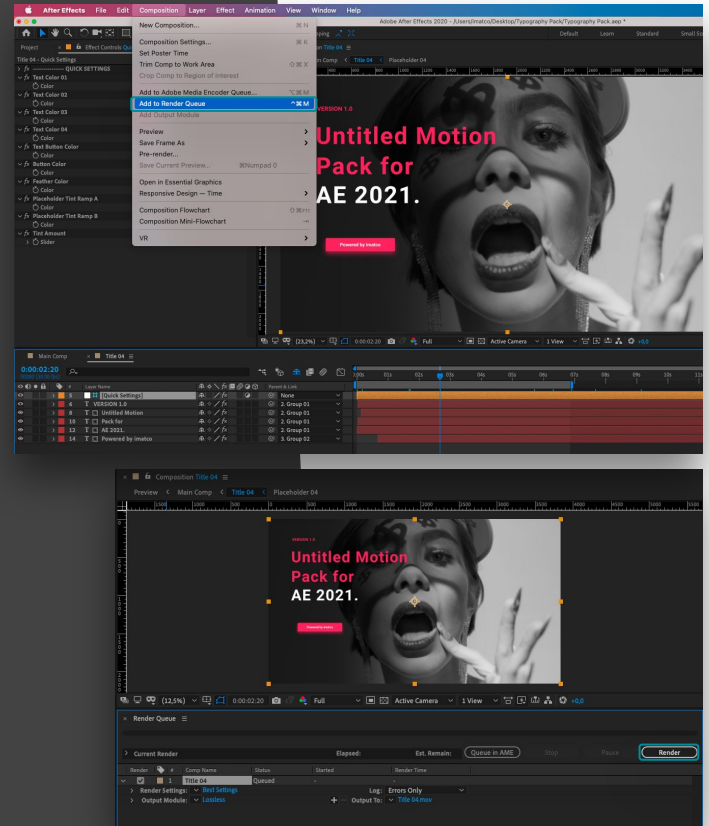

Quick Settings

1. To change general settings, select **Quick Settings** layer and make right click on it to display properties. Choose **Open > Open Effects controls** from drop down menu.
2. Click on **Quick Controls Layer** to display the Quick Settings on **Effect Controls** tab.
3. Change color and set other parameters as you need. Use the timeline to preview changes.
4. Once you are happy with the result, **Trim the work area** "In and Out" in timeline composition.

Final Render

1. Click on the timeline and go to top menu bar **Composition> Add to Render Queue** to display render settings.
2. Set **export settings** as needed, rename the output module file and hit the **render button**.

Thank you for your purchase!

Don't forget to rate the project on your [Download Section](#)

That's it!

If you have questions or need help setting the project, [let me know](#).
