

Welcome to Rubik - Website Promo template

You can preview All Scenes in Final Output Composition
Also you can find all Scenes in Project Manger under named Folders.
Next You will find out how to customize scenes:

1. **Color Control** layer with following options:

- Text 1/2/3 Color - you can change color of main text blocks in the scene
- Line Color - chnage color of line (text 4)
- Box Color - change color of box under Icons
- Icons Color - Changes color of icons
- BG 1/2 color - change background colors
- Shadow Color - chnage color of shadow under Website UI.
- Header BG Color - chnages color of Header (line above Website UI)
- Header Text COLOR -changes Header text color
- Dot Color 1/2/3 - Changes colors of header dots (left side)
- Small Dot Color - Changes colors of header dots (right side)

2. **Time Extendingg of scenes:**

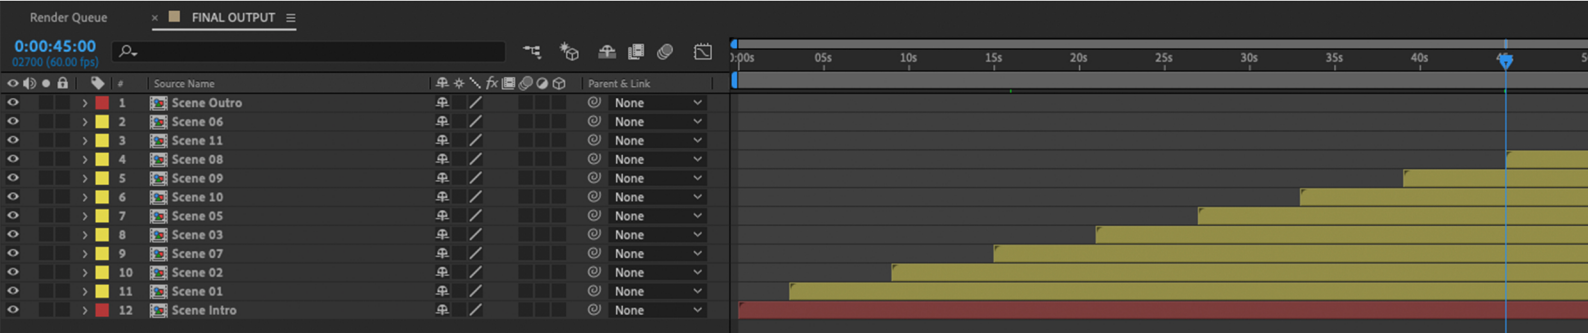

You can find END CTRL layer in every scene, by moving this layer on timeline you can change length of this scene. End of END CTRL layer is an end of animation, Start of End CTRL layer is a start of Ending animation.

2. **Website UIs, Photos, Videos**

You can drop all your UI / Photos / Videos in UI/UX Holder 01 Composition.

4. **Scenes order in Flnal Output**

Every next Scene should be Above previous one in timeline:

Next scene starts after START of END CTRL layer of previous scene, e.g.:

If Scene 01 End Ctrl layer starts from 6 seconds mark, so Next Scene 02 should start 6 seconds after start of Scene 01. Start of Scene 01(Previous scene) should be aligned with a start of END Ctrl Layer of Scene 02 (Next scene)

4. **AUDIO COMPOSITION**

Here you can drop your Audio file.

5. **Render.**

All scenes are at 1920x1080 resolution and 60 fps.

Thanks for purchase!
