DREAMS
DON'T
WORK
UNLESS
YOU DO

DO ALL THINGS
WITH LOVE

IV. HOW TO USE

1. Open **ARTDREAMS** ae file in Adobe After Effects.
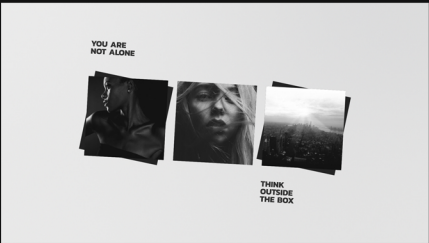

2. Change your logo and a website.

*To change it, click twice on a text icon, and type yours one.
You can also change settings of text, it's color and font type in character tab
of After Effects.*

*Choose an old logo you want to replace in Footage,
mouse right click => Reload Footage => File..
Then choose the logo file on your computer. It will be reloaded.*

To change logo scale, press "S" while logo is chosed on a
timepannel. Change percent of scale.

3. Replace pictures with your stuff.

*Choose a picture you want to replace in Footage, mouse right click
=> Replace Footage => File... Then choose a picture on your computer.*

4. Type your Headlines and your additional text.

*While typing be carefull not to go out from composition borders.
There is a limit line in additional text composition.*

To change logo position, press "P" while logo is chosed
on a timepannel. Change coordinates of logo (x / y)

5. Render your video.

*(Composition / Add to Render Queue).
To render file you have to choose a file format and a file name in Render Queue settings.*
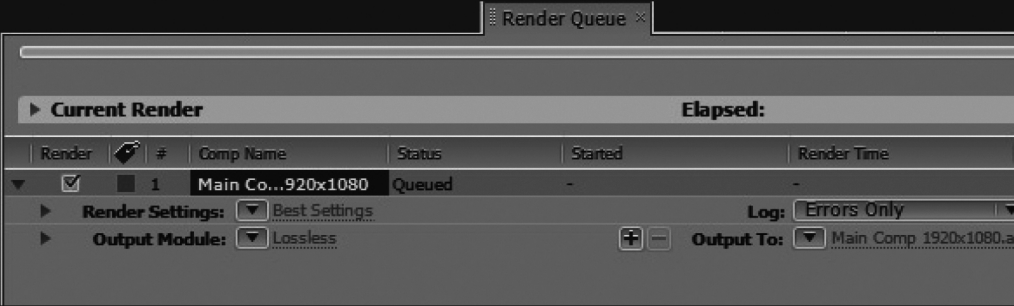

Some layers where hidden while making project for simple usage..

To show hidden layers, click   button above the timepannel. You will be able to change the flow of project.

Be carefull, you can make it working non-correctly if you have no enough After Effects knowledges!
