

## ~ HOW TO INSTALL THE TEMPLATE ~

This template can be used inside Final Cut X with or without Apple Motion installed.

USE this method if you have Motion installed on your Mac Copy 'Rotating Logo Reveal 4k' or 'Rotating Logo Reveal 4k Square version' folder to:

~/Movies/Motion Templates/Generators

USE this method if you DO NOT have Motion installed on your Mac Copy 'Rotating Logo Reveal 4k' or 'Rotating Logo Reveal 4k Square version' folder to:

/Applications/Final Cut Pro/Contents/PlugIns/ MediaProviders/ MotionEffect.fxp/Contents/Resources/Templates/ Generators

### Basic editing in Apple Motion:

When you open the project go to "Media" and import your logo with right mouse click > import media.

Now drag that logo in the timeline "Main group" > "Logo and Transition" > "Logo" > "Dropzone", adjust the crop in Inspector, in case your logo is cropped.

Adjust all filters under "Dropzone" layer.

Double click on the tagline and change the Text or simply delete it.

Import your audio file and you are ready for rendering.

### Basic editing in Final Cut Pro X:

Import project from "Title and Generators" panel, under "Generators" (sometimes Custom group)

Drag it on the timeline, drag your logo on the timeline also, Click on the project in the timeline, then click on the top right corner "Generator Inspector"

You will see the Inspector custom panel.

Click on the "drop zone" and select your logo from the timeline, then click on "Apply Clip"

Adjust the logo size, position, shadow, camera DOF and Background colours.

Change the Text and position.

If you want to use "Glint effect" check it but make sure you need to be patient because it will increase GPU rendering, but final effect is awesome.

That's it, enjoy the template!

### Assets:

Font used for tagline:

"Montserrat" – <https://fonts.google.com/specimen/Montserrat>

Music used in preview:

Rotating Logo - <https://audiojungle.net/item/rotating-logo/25007416>
