Hello! Thanks for buying this template!

It's really easy to customize:
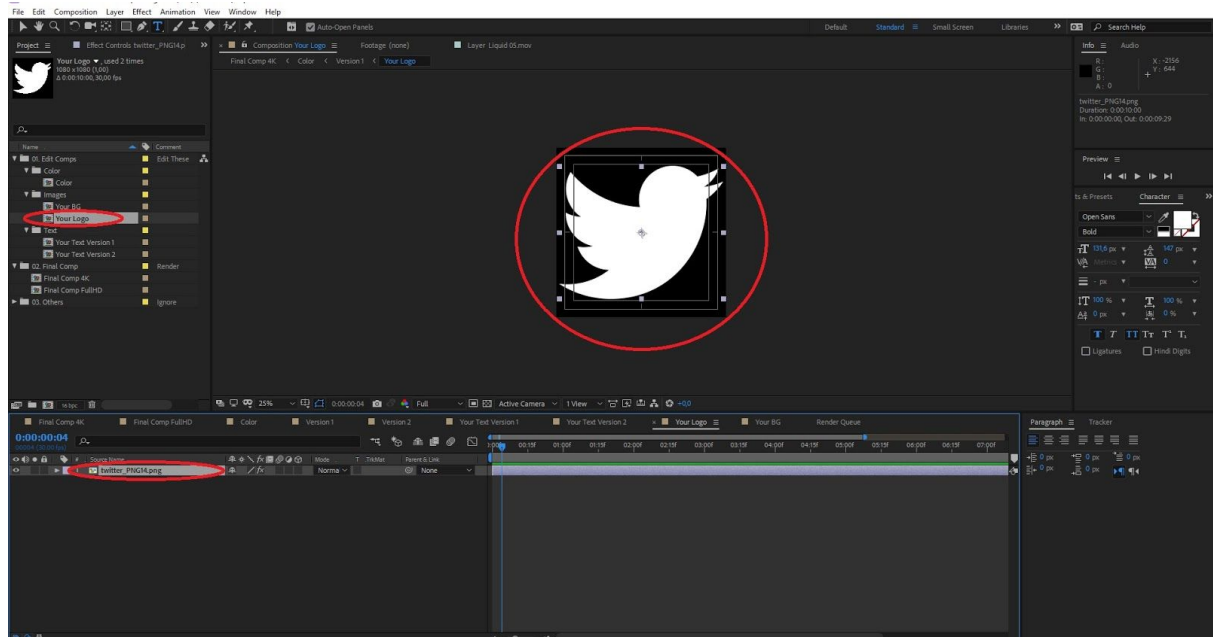

1. Put your text in "Your Text" composition

2. Change the color of your text. Double click on text layer and choose color

## 3. Put your logo in "Your Logo" composition

4. Put your photo or video in "Your BG" composition

5. Use "Control" layer in "Color" composition to change colors

6. After that render "Final Comp 4K" or "Final Comp FullHD" composition to get the final result

That's all.
Hope you like it and again - thanks for buying. Please do not forget to rate if you like!

Regards
