How to edit project

1. Open the project and transfer your images to the program (the image is an example of)
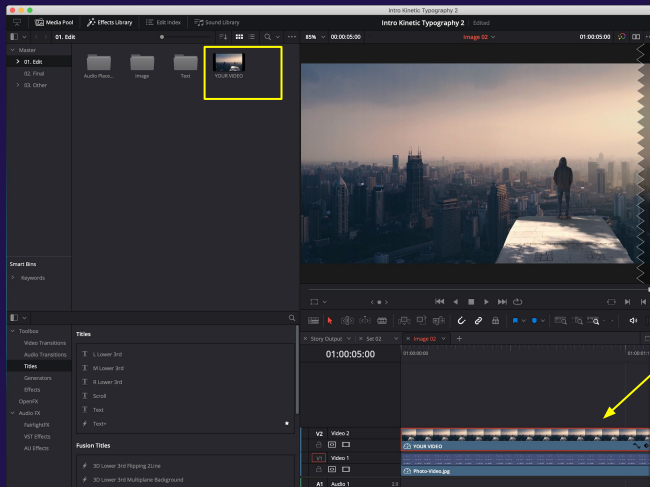

**2.** Open the composition, the texts are highlighted in yellow, the images are highlighted in red.
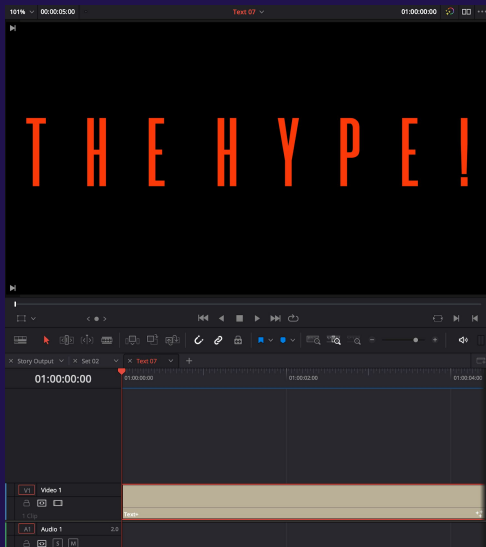

Replace Video or Photo

Drag your photo or video composition "Image"
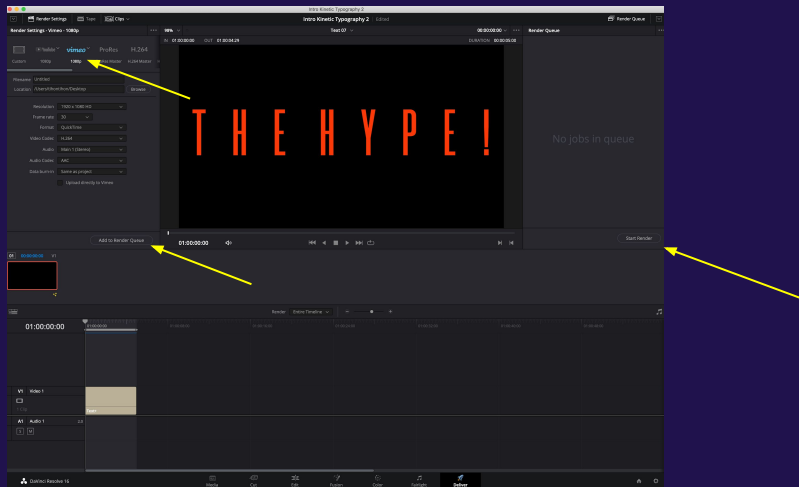

How to change the text

Enter your text

Select a text style

Render

After you have completely finished editing (added all the videos, music, and changed the text)
Make sure that the entire project is open on the time line (History output)
Select the "Deliver" tab in the lower panel"
In the settings, I recommend selecting the Vimeo preset and specifying the H. 264 codec.
Click Next add to Render - > start Render
