PROJECT'S MAIN STRUCTURE

- 2- To change logo and tagline you have to go to project window in After Effects and open composition "02 - VECTOR LOGO, TEXT LOGO & TAGLINE PLACEHOLDER (EDIT) -". From there you'll see this composition window:

There are markers with instructions about where and how to replace "TEXT LOGO" placeholder, "VECTOR LOGO" placeholder and "TAGLINE TEXT" placeholder, using your own logo and text. Adjust scale and position of your logo and text with the simple x - y coordinates inside each layer and see how it looks directly on "01 - MAIN COMPOSITION (RENDER) -" window that's already open in the project. **Don't forget to turn off "cube logo" placeholder (by clicking the small eye icon on the left of the layer) once you have ready your own logo and text.** To change tagline text, open composition "03 - TAGLINE PLACEHOLDER (EDIT) -" and type it inside this composition using the text layer placed there.

3- You have a COLOR CONTROL to change colors combinations of different elements in the project:

- a) Open "01 - MAIN COMPOSITION (RENDER) -"
- b) Select "- COLOR CONTROL -" layer
- c) Go to Effect Controls window in After Effects, from there you just need to slide over the angle controls and pick color of the elements to get different combinations. Then you can see changes directly on "- 01 - MAIN COMPOSITION (RENDER) -" window. That's all. You're ready for final render.
